Hallo,
unfortunatly i'm not able to change the awl scoring anymore.
How or where is the default prefs path defined ?

Command Line:
spamassassin --remove-addr-from-whitelist nobody@nowhere.de

Messages:
[2644] warn: config: can not determine default prefs path
[2644] warn: config: failed to create default user preference file C:\Dokumente und Einstellungen\USER/.spamassassin/user_prefs

Please specify the configuration path like this: -c sa\ruleset.

I don't get it working.

What's the exact syntax ?

spamassassin -c e:\nst\sa\ruleset --remove-addr-from-whitelist nobody@nowhere.de
(same failure message)
spamassassin --remove-addr-from-whitelist -c e:\nst\sa\ruleset nobody@nowhere.de
(same failure message)

The -c option at the end ?

Please try this:
1. Open a command line window and change to the NST installation directory.
2. sa\spamassassin.exe -c sa\ruleset --remove-addr-from-whitelist nobody@nowhere.de

---

Same failure message:

E:\NST>sa\spamassassin -c sa\ruleset --remove-addr-from-whitelist nobod@nowhere.
de
[1420] warn: config: can not determine default prefs path
[1420] warn: config: failed to create default user preference file C:\Dokumente
und Einstellungen\RAK/.spamassassin/user_prefs

SpamAssassin auto-whitelist: removing address: nobod@nowhere.de

However,
it works, (at least, looks like)
but the failure messages appear.
