[View Forum Message](#) <> [Reply to Message](#)

Is there a place that lists what each item listed in the spam status for example here is a recent message that got flagged, it would be nice to know what each one means:

DNS_FROM_RFC_POST,HTML_50_60,HTML_FONT_BIG,HTML_IMAGE_ONLY_12,
HTML_MESSAGE,MIME_HTML_ONLY,MISSING_SUBJECT,MSGID_FROM_MTA_HEADER,
SPF_HELO_PASS,SPF_PASS

some are pretty simple but some aren't
