Hi there

hope someone can help me with my problem.

We use a windows 2000 Server with a Tobit David XL Server .

I tryd to install NO-SPAM-TODAY on the Server as SMTP Proxy.

When i try to Configure the Port Settings i get a 550 error.

550 Requested mail action not taken: mailbox unavailable or forwarding not allowed

this stand in the Server logs.

(00000580) New Connection 192.168.155.3 Accepted: 00000636

[636] 220 Service ready by DvISE PostMan (0228) ESMTP Server (Tobit Software, Germany)

(00000636) write (91)

(00000636) read (14/0)

(00000636) Got complete TCP Message (Size=14)

[636] HELO SERVER

[636] 250 b-r-l.de Hello SERVER, pleased to meet you

(00000636) write (49)

(00000636) read (33/0)

(00000636) Got complete TCP Message (Size=33)

[636] MAIL FROM:

[636] 250 ... Sender ok

(00000636) write (39)

(00000636) read (23/0)

(00000636) Got complete TCP Message (Size=23)

[636] RCPT TO:

[636] 550 Requested mail action not taken: mailbox unavailable or forwarding not allowed

(00000636) write (84)

(00000636) read (6/0)

(00000636) Got complete TCP Message (Size=6)

[636] QUIT

[636] 221 Service closing transmission channel

(00000636) write (51)

[636] SMTP RX Connection closed

I try to crate a Mailbox named Postmaster, but the Error is still there.

Can i Change this "postmaster" user into "Admin" somewhere ????

i know that is working with admin
