Hi ,

I setup NST as smtp proxy for our e-mail server . It runs well but the log file or active log screen in NST admin program can't show mail subject sender address or receiver address .A part of our log file show blow

Mar 29, 2007, 18:35:44 Session 3: (SpamAssassin) Filter result is accept/deliver

Mar 29, 2007, 18:35:44 Session 3: (SpamAssassin) Spam score: -93.3

Mar 29, 2007, 18:35:44 Session 3: Incoming mail action: accept/deliver

Mar 29, 2007, 18:35:58 Session 4: (SpamAssassin) Filter result is reject/redirect

Mar 29, 2007, 18:35:58 Session 4: (SpamAssassin) Spam score: 15.1

Mar 29, 2007, 18:35:58 Session 4: Incoming mail action: reject/redirect

Mar 29, 2007, 18:36:13 Session 0: Received end of data, mail size 2kB

Mar 29, 2007, 18:36:13 Session 0: (Spam Trap) No action

Mar 29, 2007, 18:36:25 Session 2: Received end of data, mail size 3kB

Mar 29, 2007, 18:36:25 Session 2: (Spam Trap) No action

In global setting ,I have already checked the log option "Enable extended logging " why doesn't it's log file contain subject ,sender or other information ?

Please help me ,thanks !!!
