Hi,

I've currently testing NST on our Exchange 2007 server on a Same Server and Same IP Address configuration but used different port below. I'm using Cisco PIX 501 firewall.I've opened Port 26 on the firewall but I don't see any mails passing through on the NST. Is there anything I've missed on the configuration? on Exchange? or NST ? Firewall?

Would appreciate it much for your help. Thanks.

Incoming IP: All interface
incoming Port : 26

Outgoing Server:
Outgoing Port : 25

Dennis
