Hi there,

After upgrading from 2.x to 3.x I have seen a dramatic raise in emails being delivered, instead of marked as spam.

And its emails with invalid email addresses - ie :

Name / email : "Alice Eaton" / "Alice Eaton"

Name / email : "Brady Roberson" / "Brady Roberson"

So there are no valid email address from the sender - how come these are not sent away as spam immediately ?

Regards,
Tony Fonager
