I have a long standing NST 2.3 version running on my server, but lately it's letting spam through in droves. I attempted to changed the required score from 5.5 down to 4.8, but it's completely ignored even though the admin panel shows the correct value, as well as the .cf file:

X-Spam-Checker-Version: SpamAssassin 3.1.5 (2006-08-29) on cogbot

X-Spam-Level: ***

X-Spam-Status: No, score=3.2 required=6.3 tests=NO_DNS_FOR_FROM,NO_REAL_NAME,SPF_HELO_PASS,SPF_PASS autolearn=no version=3.1.5

Received: from byteplant.com ([78.47.119.33])

by www.cognivore.com ([192.168.254.25], envelope-sender=)

with No Spam Today! Service V2.3.5.2 Trial/Freeware

for 127.0.0.1; Fri, 23 May 2008 10:30:33 -0700

It seems to be stuck on 6.3. I have completely uninstalled and reinstalled NST, and it still always ends up with a required score of 6.3.
