You can change this behaviour. We did not think that anyone would want it otherwise, so this setting is not visible in the attachment filter setup wizard, you have to edit the configuration file nospamtoday.cf with a text editor instead.

Find the attachment filter config section in the config file, and add the following line to this section:

```
BlockListPolicy="accept/deliver"
```

The default setting is "reject/deliver".

Post Edited (02-17-05 12:13)

It would be very helpful if you had an additional policy for blocked Html . So often the reject/deliver comes into force for an "HTML attachment that is only a copy of the email text". The mail is delivered but the sender gets an annoying and inaccurate delivery failure report.

We need an: "Attachment blocked, but email delivered report instead"
