---

I have NST running and installed but viruses are still getting through!

I have the following on the command line option:

```
cmd /Q /D /C "D:\Program Files\FS\F-Prot\fpcmd.exe" /silent
```

Yet someone else I know running it has the following:

```
%SCANNER% /silent %IN% /report=%ERR%
```

Which is correct or are they both correct?

Why am I still getting Viruses coming through?

Cheers
