Hallo,  
unfortunatly i'm not able to change the awl scoring anymore.  
How or where is the default prefs path defined ?

Command Line:

```
spamassassin --remove-addr-from-whitelist nobody@nowhere.de
```

Messages:

```
[2644] warn: config: can not determine default prefs path
```

```
[2644] warn: config: failed to create default user preference file C:\Dokumente und  
Einstellungen\USER\.spamassassin/user_prefs
```
