Hello,

Another question:

I would like to set up all the dutch mails as spam-free. Can I do this?

If I set the parameter ok_languages to 'nl', does it mean all the other languages will be blocked? (I hope it doesn't, because a lot of languages are used in our company)

So, I would like dutch messages to pass the spamfilter without further checking and other languages to be checked normally.

Can someone help me?

Thanks,

An
