---

After successfully finishing the first beta test phase, NoSpamToday! 2.0 has already been proven to be very reliable and stable. The Byteplant developer team again likes to thank all beta testers that joined us in the first phase for helping us to find bugs and to improve this version.

With the end of the first beta test phase, NoSpamToday! Version 2.0 is now available for public beta testing.

The beta test downloads are available from this page:

<http://www.nospamtoday.com/server/betatest.html>

Please help us to improve NoSpamToday!, any comment or suggestion is highly appreciated.
