
Subject: Forced delete of "Bad" SPAMs

Hi there,

We currently have NST setup to still send eMails to customers with an amended subject line - this is great for us, as we still haven't cracked the learning issue as mentioned earlier in the forum (pretty close now!)

My question though - all SPAM eMails are delivered to customers, regardless of their "severity" ...

Ideally, we want to delete SPAMs that have been flagged SPAM based on certain rule names (such as SPAMCOP_URI_RBL, OB_URI_RBL, WS_URI_RBL) but still deliver, for now, all other SPAM mails.

Is there a way to do this?

Many thanks!

Mark Haller
