## Subject: Block email containing a specific link ?

Posted by Andy Teal on Thu, 08 Jul 2004 07:59:10 GMT

Hi,
Could anyone tell me a quick way to stop this wave of porno SPAM that keeps getting past "No Spam Today!"
I have tried the sa learn stuff (using ThunderBird to pull off the mails from Exchange) but these spams keep getting through. They all have simliar inks in them and I would be happy to block anything that contained a link to  "perso.wanadoo.es"
How do I do it ?
(Stopping this **** is becoming a full time job!)

Thanks,
Andy

The link in question:
egocentric symplectic assimilable pride warble newsletter
