Is it possible to change the message / text which No Spam Today puts in the mail which is detected as Spam?

The spammail is now send as attachment to the original recipient in an email with the text:

"Spam detection software, running on the system "xxxxxxx", has identified this incoming email as possible spam. The original message has been attached to this so you can view it (if it isn't spam) or block similar future email. If you have any questions, see your mail administrator for details."

I would like to change this text. If it's possible, how do I do this? Or do I have to use the registered version for this?
