We are happy to announce the release of version V3.1.2.1 on Mar 26, 2008.

The most notable change is support for SpamAssassin client/server filtering, using spamd and spamc. This should improve performance especially for sites handling heavy email traffic.

For a complete list of changes, please find the revision history here:

<http://www.byteplant.com/support/nospamtoday/server/changes.html>

The new version can be downloaded here:
