Hello.

I need to have report containing 5 columns:

1. datestamp,
2. sender address,
3. receipient address
4. score
5. topic.

According to this - is it possible to customize log or additional report with structure similar to this below?

Datestamp, From, To, Score, Topic

2004-12-06, sender@example.com, recieipient@example.com, 10.1, Test Mail Topic

Thanks in advance,
Darek
