Hi,

Just want to let you all know that besides the free Clamav for Linux FreeBSD (<http://www.clamav.net/>), there is a free version for windows too.

Clamwin can be found here: <http://www.clamwin.com/>

Gnnna test if it works with No Spam Today!

Regards,
Johan

Please use the Summit Open Source Development Group (SOSDG) ClamAV build:
<http://www.sosdg.org/clamav-win32/index.php>

I have tried to set this up, but the filter test keeps coming back with errors. I've run the reg file to set the tmp dir vairable.

I still can't get it to recognize a virus.

I'm using ClamWin (www.clamwin.com), and it seems to work fine. Is there a specific reason you recommend the SOSDG build of ClamAV over ClamWin?

Thanks,
Jon
