Hi,

I'm trying to add a virusfilter using CA eTrust antivirus.  
When I choose 'Computer Associates' as vendor, the command line is set correctly. But in the screen where I can set the result codes and the action, there is displayed 2 identical lines:

```
101 / Reject and Delete  
101 / Reject and Delete
```

When I change a value in either line, the value is changed in the other line too. So I cannot make the 2 lines different.

When I try to continue, I get an error message, saying that there are 2 equal result codes, and I get back to the same screen.

When I delete one line, the administrator tool quits.

How can I resolve this?

The CAAV default config is broken. As a workaround, you can enter the settings by hand:

- Choose as the vendor
- use these settings (or similar):

Commandline:  
%SCANNER% -ARC -NEX -LIS:%ERR% %IN%

Scanner:  
c:\\program files\\CA\\SharedComponents\\ScanEngine\\inocmd32.exe

Exit codes:  
0 --> accept/deliver  
101 --> reject/delete

Ok, it looks like it works OK this way.

A bit strange: when choosing as vendor, you cannot browse to the scanner executable (inocmd32.exe) as the field is grayed out.

But I've put everything in one single line:

```
C:\Program Files\CA\Sharedcomponents\Scanengine\inocmd32.exe -ARC -NEX -LIS:%ERR%  
%IN%
```

(omitting the %SCANNER% variable of course)  
and it seems to work ...

Thanks for the tip
