Is there a way to block all pornographic material, using Spam Assassin, before it reaches the end users?

This has become a huge problem for us, and I'm in over my head in trying to stop it.

Regards,

Eric

Spam Assassin's rule set includes filters that can pick up a very high percentage of porn. You may still get a few through though - I had one come through today that was loaded up with verses from the Bible... and one sentence with a link to a porn site.. Even so, spam assassin nearly stopped it because it was rated as likely spam.

FWIW, I had been getting 300+ spams a day with another product, but after adjusting the rules I see about one or two a day get through.
