Hi,

I just searched the nospamtoday.log file for something and found out the following messages:

(SpamAssassin) [200] warn: bayes: cannot open bayes databases db\bayes_* R/W: lock failed: File exists

(SpamAssassin) [3940] warn: locker: safe_unlock: unlink failed: db\awl.lock

(SpamAssassin) [2000] warn: locker: safe_lock: unlink of lock file db\awl.lock failed: No such file or directory

Is this normal? if not, what should I do about it?

Thanks,
Yuval.

Please check if there are outdated *.lock files in the db subdirectory.
If this should be the case, delete them manually.
