1) Are the files ".\SA\DB\bayes_toks.expirennn" the expired tokens that have been removed from the database?

2) How long do these files need to be saved? Can they be deleted nightly?

For example: after 60 days, I have 400MB of these files....

12/31/2004	04:03a	2,859,008	bayes_toks.expire113

These files can be safely deleted.

If lots of these files exist, consider turning auto-expire off, and use the Windows task scheduler to expire the Bayes database.

See the manual, and also:
