We have upgraded to NoSpamToday! V2.0.12 a few days before with no problems (review your rulesets (lint) there are some changes !!) without any problems . As I have reviewed the logfile today I have found some lines:

Do we have a converting problem ? Any ideas ?

Bayes DB auto expire sometimes may take several minutes. Sometimes SpamAssassin 3.0 does not clean up a lock if it is interrupted.

Check this forum thread for the solution:

Thanks a lot for the quick reply !!

In our case, when the service was stooped the file was gone.

But never the less, after running the rest of the commands from the thread the line did not appear in the log for more than an hour. So I guess the problem is solved.

Thanks a lot
