Hello again!

In my first posting, i searches a solution for blocking all recipitients with no Exchange Mailbox. By reading the "noSPAMtoday.cf", i found an Entry "IncludeRecipientsList=0"

Which function can i use with this Entry?

The "IncludeRecipientsList" switch controls whether the current list of recipient addresses used by NoSpamToday is included in the admin mail that you receive daily . It is especially useful to find out which mail addresses are accepted by your Mail server.

As NoSpamToday only accepts mails for addresses your Mail server accepts, the best solution is to disable unwanted addresses directly in your Mail server.

Please see this HOWTO document for details:
