Every day when I receive a log e-mail created from No Spam Today! it always shows this

```
-----  
Days Installed:          4  
Days Running:           1  
Mail Addresses Used/Licensed:  0/10
```

Mail Statistics (Since Last Report):

```
spam mail:                0 (00.0%)  
legitimate mail:         0 (00.0%)  
unchecked (exceeding max. mail size):  0  
unchecked (spam check disabled):      9  
unchecked (error):        0  
total no. of mails received:          9
```

List of mail addresses in use:

And the list is correct there is no mail address coming up in that screen

My configuration is as follows

incoming IP any
Port 25

Server Ip Address
Port 799

when I click finish the program restarts and the relay function shows no errors. Any thoughts as to why the program is not functioning correctly???

Any help would be most appreciated.
Cheers
Sean

What is your setting in the Admin Wizard "Restrict Spam Checking to" page?

Please send in your nospamtoday.cf and nospamtoday.log files by email, maybe we can find some problem in your config.
