Every day at midnite, I recive this "dayle email stats" email from my NoSpamToday installation, which has a 25 users licence.

It looks something like this :

Mail Statistics (Since Last Report):

spam mail:	549 (17.6%)
legitimate mail:	2578 (82.4%)
unchecked (exceeding max. mail size):	4
unchecked (spam check disabled):	1714
unchecked (error):	0
total no. of mails received:	4845

I was wondering, what does the "unchecked (spam check disabled)" mean ? Where does that come from - I have only used 23 og 25 email addresses, so I cannot come from skipping email addresses in the spam check.

Please explain it to me!

Regards,
Tony

What is the number of used addresses reported in the daily admin mail?

What is your setting in the Admin Wizard "Restrict Spam Checking to" page?

Please send in your nospamtoday.cf and nospamtoday.log files by email, maybe we can find some problem in your config.
