Hi Support!

We are currently evaluating the SPAM Proxy.

In the daily report it said that 247 Email addresses are in use, our company has about 60 Email accounts.

The list of mail addresses in use are also containing the email addresses of those people our company send mail to. Is that correct ?

Thanks

Andre

Your are routing outgoing mail through NoSpamToday!.

This is not necessary, try if you can reconfigure your users' mail clients so that they connect to the mail server directly when sending mail, bypassing NoSpamToday!.
