I got this report this morning:

Mail Statistics (Since Last Report):
spam mail: 172 (66.4%)
legitimate mail: 87 (33.6%)
unchecked (exceeding max. mail size): 14
unchecked (spam check disabled): 110
unchecked (error): 0
total no. of mails received: 383

This is the first report after upgrading to the new release of NST. This is also the first time I've seen a number of emails unchecked (spam check disabled). What does this number reflect?

Bill Healy

It says that the number of email addresses currently in use with NoSpamToday! exceeds the number of addresses you have licensed. In your case this fact prevented 110 emails from being checked for spam. To find out which addresses are currently in use please check the "Include List of Addresses Used" option in the "Daily Admin Mail Configuration" in the NoSpamToday! Admin wizard.
