For no reason my install now when it sends me the report daily, reports different numbers of email accounts that are being filtered.

I have purchased 25 Recipients and have not changed the number of accounts being scanned, yet for the last week the system daily reports tell me different numbers of accounts that are being scanned each day!

They are never the correct number. They should be 19 BUT

Sun 26th - 13/25 25 Recipients

Sat 25th - 12/25 25 Recipients

Thur 23rd - 8/25 25 Recipients

Wed 22nd - 14/25 25 Recipients

Tue 21st - 13/25 25 Recipients

Mon 20th - 12/25 25 Recipients

ADVICE PLEASE?

Help.....

I am worried that mail isnt gettign filtered or maybe even blocked?

The list only reflects the recipient addresses that have received mail since the time the NoSpamToday! service was started.

It does not show all the recipients you configured, until everyone got mail.
