We are using nospamtoday V2.0.2.3.

If I activate the attachment filter for some extensions (e.g. exe bat scr), then all attachments without any extension are also blocked.

Ist this a bug or can I change the configuration, so that these attachments can pass?

This is a known issue. We'll change this behaviour in one of the next updates so that attachments without an extension (this should rarely be the case) are passed through.

Sorry, but attachments without an extension is NOT a RARELY thing. Macintosh user are sending a lot of files without extensions!!!

Please fix this asap. I can't use the attachment filter this way!

Regards,

Dave Camenisch

Version 2.0.3.1 (released on Dec 22nd, 2004) contains a fix for this issue.

For a complete list of changes, please find the revision history here:

<http://www.byteplant.com/support/nospamtoday/server/changes.html>

The new version can be downloaded here:

<http://www.nospamtoday.com/download/server>

Version 2.0.3.1 it's still not working here. Instead of the original attachment I get an attachment named "blocked_attachment_info.txt". Inside this textfile stands "Name of blocked attachment: ReadMe".

I installed the attachment filter with standard configuration.

Here is the output from the log window:

Dec 23, 2004, 13:44:42 Session 0: (Attachment Filter) From: xxxx@xxxx.ch

Dec 23, 2004, 13:44:42 Session 0: (Attachment Filter) Subject: testfile

Dec 23, 2004, 13:44:42 Session 0: (Attachment Filter) To: xxxx@xxxx.ch

Dec 23, 2004, 13:44:42 Session 0: Received end of data, mail size 5kB

Dec 23, 2004, 13:44:42 Session 0: (Attachment Filter) Filter result is accept/deliver

Dec 23, 2004, 13:44:42 Session 0: (Spam Trap) No action

Dec 23, 2004, 13:44:42 SpamAssassin DNS server(s): 195.186.xxx.xxx 213.193.xxx.xxx

Dec 23, 2004, 13:44:51 Session 0: (SpamAssassin) Filter result is accept/deliver

Dec 23, 2004, 13:44:51 Session 0: (SpamAssassin) Spam score: 0.6

Dec 23, 2004, 13:44:51 Session 0: Incoming mail action: accept/deliver

Dec 23, 2004, 13:45:15 Session 0: Connection closed by client

Regards,
Dave

Hmm.

I just checked, and it seems this particular fix did not make it into the release. I just updated the revision history accordingly.

I'm sorry about this, it will be included in the next version for sure.

running v2.0.5.1:

We do also have the problem, when activating "Attachment filter" for only filtering MIME-errors. Then all attachments with an ending dot will be exchanged by blocked_attachment_info.txt. All other Files pass the filter quite correct.

So older Macintosh-Mails loos their attachment.

Is there another solution than deactivating the filter?

Thanks for bringing this to our attention.

The problem will be fixed in the next release.
