HOW CAN I START NO SPAM TODAY ON THE SAME SERVER WHICH MAIL SERVICE IS
I WONDER IF IT IS POSSIBLE TO CARRY OUT THE ANTI-SPAM FUNCTION ON THE MAIL

And what does the nospamtoday.log file say ?

Please make sure that a SMTP service is actually listening on port 26 of this machine (try a telnet A.B.C.D 26 to find out). If your problem persists, please send your nospamtoday.log file to nstsupport@byteplant.com for analysis.
