Subject: Just updated to new version...
Posted by hforo on Fri, 07 Oct 2005 00:55:19 GMT

I had a much older version before... but sa-learn.exe is pegging my cpu at 100% and has been for about 30-45 mins (ever since the new version finished installing). Is it doing something that will eventually end? Or is it stuck?

Thanks :)

Your post was Friday, so I suppose sa-learn has finished by now.
Updating older version Bayes DBs may take some time.
