Hi,

I installed NST! 2.3.3.2 yesterday and added the new Delay filter (30s, 256k) as the first in my chain. In the Log I can see the delay occurring.

I'm interested to see how well this new filter performs, but in the daily statistics mail there are no statistics for the Delay filter. Could they be added please?

Thanks,
Jon

Delay Filter stats are not yet individually listed, but after configuring the delay filter, you should see a substantial increase in the number of "unexpected client disconnects".

Ok, that makes sense. I'm not seeing a huge increase in that value, but will continue to monitor it.

Still, could you put this on your Wish List for a future release.

Thanks,
Jon

Where do you see this "unexpected client disconnects" message?

Cheers, Rob.

> Where do you see this "unexpected client disconnects" message?

They are listed in the general section, and not separately with the filter. This is a known issue and will be fixed in one of the upcoming releases.

Sorry for being dumb but where is the "general section"?

Thanks, Rob.

Ahh, answering my own question - I assume you mean just as lines like this in the log:

Dec 13, 2005, 01:46:52 Session 2: Incoming mail action: delete (unexpected client disconnect)

Cheers, Rob.

The line you want in the report looks like this:

Delete (unexpected client disconnect) 12303 (52.6%)

Found it - the daily report was going into a share sub-folder on our IT shared account and I'd forgotten that.

We're at ~15% over a 14 day period but that has included Christmas where maybe even spammers have some time off :)

Happy New Year, Rob
