We are happy to announce the launch of the NoSpamToday! contribution area on

<http://www.byteplant.com/support/nospamtoday/contrib.html>

The contribution area provides space for the NoSpamToday! community to exchange add-on tools to further enhance NoSpamToday!.

The tools so far:

IMAP2mbox:

retrieve an Exchange mail folder to an mbox file suitable for teaching the SpamAssassin Bayes database

killtnef:

a mail filter to convert ms-tnef attachments on the fly to something more readable for people not using Outlook

spamlogs:

An analyzer for the NoSpamToday! logfiles.

Thanks Dennis, for providing the seed of this compilation!

Additional contributions are welcome, please mail us at contributions@byteplant.com.
