Hi All, I'm a bit new to this so forgive me if the answer is obvious.

Is it possible to edit the format of the daily report? it would be great if I could change the line that says Daily statistics for proxy "SMTP Proxy" to actually have the name of the NST server instead of just SMTP Proxy. It seems very easy to edit the format of the received spam message (10_misc.cf) but I can't find anywhere to update this one.

Any help gratefully received.

You can change a proxy port's name by editing your nospamtoday.cf:
[ServerSessionManager\Ports\SMTPPort]
Name=""
