Is there any way to stop a receipt for every captured mail and just login to a single mailbox say once a week in order to review what has been captured? Point being that a majority of mail will be spam but sometimes maybe not, with the latter at least we can then un-quarantine those emails?

You can change NoSpamToday!'s Spam Mail Policy to "Reject&Redirect".
Please remember that the redirect recipient address is configured in NST's
SMTP Port configuration.
