Using version 2.3.5.3

Hello,

Since a couple of days, I don't receive stus reports no more from NST. When testing the mail settings in the global settings I get a "Connect" error. Also, I'm not able to perform an open relay test.

Any idea?

Bart

maybe a virus scanner or firewall is blocking SMTP traffic ?
Can you open a command prompt and:

```
telnet "yourmailserver.yourdomain.copuntry" 25
```

If this is not working somewhat's blocking smtp traffic

You were right! Virusscanner blocked traffic.

THX freddy
