Hello

My NST stops after a few minutes with the following lines in the log.

Nov 16, 2006, 08:56:21 No Spam Today! Service V2.3.5.3 Trial/Freeware shutting down

Nov 16, 2006, 08:56:21 Statistics load: 3 rows 120 columns

Nov 16, 2006, 08:56:21 Statistics save: 3 rows 120 columns

Nov 16, 2006, 08:56:21 Session 1: Connection from 198.180.134.254 closed

Nov 16, 2006, 08:56:21 Session 2: Connection from 87.205.91.158 closed

Nov 16, 2006, 08:56:21 Session 4: Connection from 89.248.144.138 closed

Nov 16, 2006, 08:56:21 Session 6: Connection from 82.114.70.44 closed

Nov 16, 2006, 08:56:21 Session 8: Connection from 217.152.247.80 closed

Nov 16, 2006, 08:56:21 Session 3: Connection from 72.11.149.227 closed

Nov 16, 2006, 08:56:21 Session 9: Connection from 60.6.251.20 closed

Nov 16, 2006, 08:56:21 Session 7: Connection from 218.244.159.49 closed

Nov 16, 2006, 08:56:21 Session 0: Connection from 196.202.90.238 closed

Nov 16, 2006, 08:56:21 Session 5: Connection from 121.124.42.54 closed

In the service manager it just says:

The No Spam Today! Service service entered the stopped state.

No other errors

When I restricted it to 10 connections it ran about 10 minutes before it stopped.

It is a Dell1425SC with 1 GB memory and Win2003

Running ImaLL 8.2

Any help is appreciated

Raymond

Please turn on detailed logging and send your nospamtoday.log to the NST Support if this happens again.

This is an old posting, but just in case it's still an issue for anyone, the solution is to download the SMTP exploit patch for imail 8.22:

[http://www.ipswitch.com/support/imap/releases/security\\_advisory\\_20061101.asp](http://www.ipswitch.com/support/imap/releases/security_advisory_20061101.asp)

It's not actually a NST error -- the SMTP service in IMail needs this patch.
