Dear Support Team,

You speak about a freeware licence for private use and a 10-mailbox-limitation putting in a nice tag at the end of each filtered mail. Where can I find this freeware-version, since downloading the normal version says "unlimited" at the licences available in the Admin ?

Thanks, Good Software !

Alexander

The version you downloaded will use the trial license for 30 days.

After the trial period has expired, the Freeware license automatically applies, no more questions asked.
