Subject: Incoming mail action: accept/deliver (marked as junk)

I would like to add a rule to Exchange server, to forward spam emails to users' spam folder. SpamAssassin marks the email header with a tag; how the other filters (i.e Blacklist,DNSBL) mark spam email when their spam action policy is set to "accept/deliver (marked as junk)". Do they add a tag to email headers?Is there any way to distinguish email marked as junk from these filters?

Thanks,

aSiMaS

Only the SpamAssassin filter (and some AV filters, depending on their configuration) supports this spam action policy, the others do not.

It was a bug in earlier versions that you could choose this from the drop down list, and this bug has been fixed in version 3.0.4.2.

Probably we will support this feature in future versions of NoSpamToday!.
