Hi Byteplant!

Thank you for a great product!

I would like to hear if it is possible to whitelist or to setup that the spam filter should leave out a hole country, ex. *@*.dk.

If so, we would stop getting e-mails about people complaining about Danish newsletters and legal advertising e-mails that they don't get.

Hope hearing some good news about the above!

Br.

Yes, adding *@*.dk to the whitelist works but we do not recommend it as it will increase your overall spam rate.

If it is really necessary, a better way to do this would be to whitelist only the senders you really want to receive mail from.
