
Subject: Virus filter says it's SPAM!?

Hi,

since I do not want to drop the email if the virus filter found a virus, I chose "accept/redirect" for this case.

The mail then is being redirected to the redirect email address specified in the SMTP Proxy config, however, subject of the mail is altered to "* SPAM *".

This is very misleading!

I wonder if there is any possibility to have an altered subject like "* VIRUS *" or so?

Thanks,
sd1401

In the CleanMail.cf file, you can add a SubjectTag="*VIRUS*" line to the virus filter configuration.
