Hi,

I have had NoSpamToday and Norton AntiVirus for quite a while.

A couple days ago Norton LiveUpdate downloaded a Norton AntiVirus patch. Since then, my email does not work with both NoSpamToday and Norton AntiVirus both on.

If I turn off NoSpamToday for the account, Outlook Express gets the email just fine. If I turn off Norton AntiVirus incoming email scanning, but leave NoSpamToday on, it also works for Outlook Express.

I am running Win98.

The message I get looks like:

Your server has unexpectedly terminated the connection. Possible causes for this include server problems, network problems, or a long period of inactivity. Account: '\_\_\_\_\_', Server: 'localhost', Protocol: POP3, Server Response: '+OK 2958 octets', Port: 110, Secure(SSL): No, Error Number: 0x800CCC0F

Please help, and thanks to anyone that helps or at least mentions they have started getting same problem in the past few days (Dec10,2004)

The problem has gone away after another Norton AntiVirus LiveUpdate updated the Norton "Core", so I guess Norton received a lot of complaints.
