---

As we talked about in the earlier thread, I am trying to make all HTML messages come up as spam.

I edited the local.cf file and HTML messages are still coming in as before. What am I doing wrong?

I putscore HTML\_MESSAGE 5.0 in the following file:

C:\Program Files\No Spam Today! for Workstations\sa\ruleset\local.cf

Here is the local.cf file:

```
# Created by No Spam Today! Admin Wizard
# http://www.no-spam-today.com
# see SpamAssassin(tm) documentation for explanations

bayes_auto_learn      1
bayes_auto_learn_threshold_nospam -1.0
bayes_path             db\bayes
report_contact        your mail administrator
required_score        2.0
rewrite_header subject * Rated SPAM by NoSpamToday! *
use_bayes             1
whitelist_from        *@byteplant.com
auto_whitelist_path   db\awl
score HTML_MESSAGE 5.0

The changes are looking good. Please send us one of the offending messages to [nstsupport@byteplant.com](mailto:nstsupport@byteplant.com), so we can have a look. Maybe SpamAssassin is unable to determine that this message is HTML.
