We are happy to announce the release of CleanMail V4.0.1.3 on Jul 8, 2009.

CleanMail Server and CleanMail Home succeed our NoSpamToday! line of products, adding anti-virus to NoSpamToday!'s mail filtering capabilities. Another important new feature is a built-in POP3 to SMTP connector.

Please check

<http://www.byteplant.com/company/news/09070101>

for more information. The new version can be downloaded here:

<http://www.byteplant.com/download/cleanmail/>

To keep your configuration settings when upgrading NoSpamToday! to CleanMail, make sure NoSpamToday! is still installed while you upgrade.

As always, we are very grateful for any feedback, feature requests and bug reports you may wish to provide.

Please contact us by email to support@byteplant.com.
