
Subject: Pre-Spam Assassin Whitelist

I'm looking for a way to only pass e-mails from specific senders to the Spam Assassin filter. For example I would only like to pass *.com, *.net, *.edu, and *.org e-mails to my spam assassin filter, all others I would like to be thrown out. Putting these directly in the Spam Assassin Whitelist would pass all e-mails from these domains, and I do not want to guess at all the possible domains that are not in this list to fill in the Blacklist. I run a VERY small e-mail server, and do not receive or want to receive e-mails from outside this short list.

Any help/ideas would be appreciated, Thanks
