---

Is there a place that lists what each item listed in the spam status for example here is a recent message that got flagged, it would be nice to know what each one means:

DNS\_FROM\_RFC\_POST,HTML\_50\_60,HTML\_FONT\_BIG,HTML\_IMAGE\_ONLY\_12,  
HTML\_MESSAGE,MIME\_HTML\_ONLY,MISSING\_SUBJECT,MSGID\_FROM\_MTA\_HEADER,  
SPF\_HELO\_PASS,SPF\_PASS

some are pretty simple but some aren't
