Hi!  
First, i say sorry for my bad english...

We had installed the latest version of the No-Spam-Today Proxy, but we have already a problem:

The reciepent get some mail with the following header:

Message-Id:  
Mime-Version: 1.0  
Content-Type: multipart/alternative; boundary="tcpdppeo\_1097190525"  
X-Spam-Checker-Version: SpamAssassin 2.63 (2004-01-11) on nospam  
X-Spam-Status: No, hits=-4.7 required=4.7 tests=BAYES\_00,HTML\_50\_60,  
HTML\_MESSAGE autolearn=no version=2.63  
X-Spam-Level:  
X-OriginalArrivalTime: 07 Oct 2004 23:11:38.0046 (UTC) FILETIME=[FF52B5E0:01C4ACC2]

Can anyone help me?

Bye

Ralf Muth

BAYES\_00 has a negative score. The best thing now is to learn this mail as spam. See this document for more on the topic of learning spam mails:

<http://www.byteplant.com/support/nospamtoday/howtolearnsam.html>
