Subject: install on exchange 5.5, nt 4.0 server

Ok, I changed my default smtp port number to 26 for exchange. I use my exchange server ip as the 'outgoing server'. Should the outgoing port number be 110, 26, or 25? The documentation shows 110.

Thanks for your help.

The screenshot in the documentation is misleading. Use the same port where exchange is listening, port 26, as outgoing port.
