We are happy to announce the release of version 2.0.4.2 on Jan 31st, 2005.

For a complete list of changes, please find the revision history here:

<http://www.byteplant.com/support/nospamtoday/server/changes.html>

The new version can be downloaded here:

<http://www.nospamtoday.com/download/server/>

Please help us to improve NoSpamToday!, any comment or suggestion is highly appreciated.

hello byteplant

documentation on how to activate and configure this? it would be great to have some sort of step by step howto manual. sa-docs on apache.org are not specific or clear enough.

would be greats.

thanks

lukas

The SPF plugin is activated by default, there is nothing you can configure other than the scores. You find the scores in the file 50_scores.cf, in the sa/ruleset subdirectory of your installation, but I would advise against modifying them.
